

## 88 HILLSIDE MIXED USE RESIDENTIAL

### PROJECT NARRATIVE

This 113,900 ft<sup>2</sup>, mixed-use infill project is located in Daly City, CA. The development also features ground level retail and an underground parking structure.

### CONX SOLUTIONS

The ConXR System was an excellent choice for this project due to its ability to accommodate the structure's challenging location on an oddly shaped, narrow lot with a steep slope. Not only was the building's unit count maximized considering it was such a narrow plot of land, but quick steel erection with no field welding and minimal surrounding road closures facilitated the ease of erection.

### KEY PROJECT DATA
